

Rebuilding Derna with Zoho

Case Study

Overview

Why Digital Construction Management Matters in Derna

Derna is in a critical phase of post-crisis urban rebuilding. Reconstruction projects require fast execution, strict cost control, transparent governance, and coordination across multiple stakeholders.

Key challenges include:

- Managing multi-site reconstruction projects
- Controlling budgets, vendors, and payments
- Coordinating contractors, consultants, and authorities
- Handling permits, drawings, inspections, and reports
- Ensuring accountability for government and donor-funded projects

Traditional tools create silos, delays, and financial risk.

A unified digital platform is essential for reliable urban redevelopment.

Zoho for Construction & Urban Development

Zoho Capabilities That Support Libya's Rebuilding

Zoho Projects

- Project timelines, milestones, and dependencies
- Contractor and consultant coordination
- Risk and delay visibility

Zoho CRM

- Government contracts and tenders
- Stakeholder and donor relationship tracking
- Centralized communication records

Zoho Books & Inventory

- Project-wise budgeting and expense tracking
- Vendor payments and procurement cycles
- Material, equipment, and asset control

Zoho People

- Workforce allocation and attendance
- Site staff records and compliance documents

Zoho Analytics & WorkDrive

- Real-time project and financial dashboards
- Secure document management for drawings and contracts

Together, Zoho provides a single operational and financial view of urban development projects.

Technology Stack

How Zolute Helps in Libya

Your Zoho Partner for Urban Development

Construction-Focused Zoho Setup

- Zoho configured for Libyan construction workflows
- Project lifecycle mapped from planning to reporting

Localization & Compliance

- Arabic-friendly processes
- Audit-ready finance and project reporting
- Government and donor reporting support

Field & Operations Digitization

- Custom Zoho Creator apps for site inspections and approvals
- Integrated CRM, Projects, Finance, and HR

Training & Long-Term Support

- Role-based user training
- Continuous optimization as projects expand
- Scalable systems for future city development
