# OVERVIEW

## Libya's Construction Rebuild Needs Digital Strength

Misrata is undergoing critical reconstruction driven by public works, housing, and commercial development. However, many contractors still rely on manual workflows, leading to:

- Delayed execution and project overruns
- Material wastage and procurement bottlenecks
- Poor tracking of labor, equipment, and site progress
- Limited reporting for clients, regulators, and investors

To scale operations in a rebuilding economy, companies require:

- Accurate project planning and scheduling
- Real-time cost and budget visibility
- Coordinated procurement and stock management
- Digital records for compliance and safety
- Transparent stakeholder communication

Odoo provides a unified system to meet these operational demands.
