

# Super Fast POS solution for Wholesale Traders

Case Study

# Company Overview

The Company trades in footwear and has business nationwide.

# Challenges and Objectives

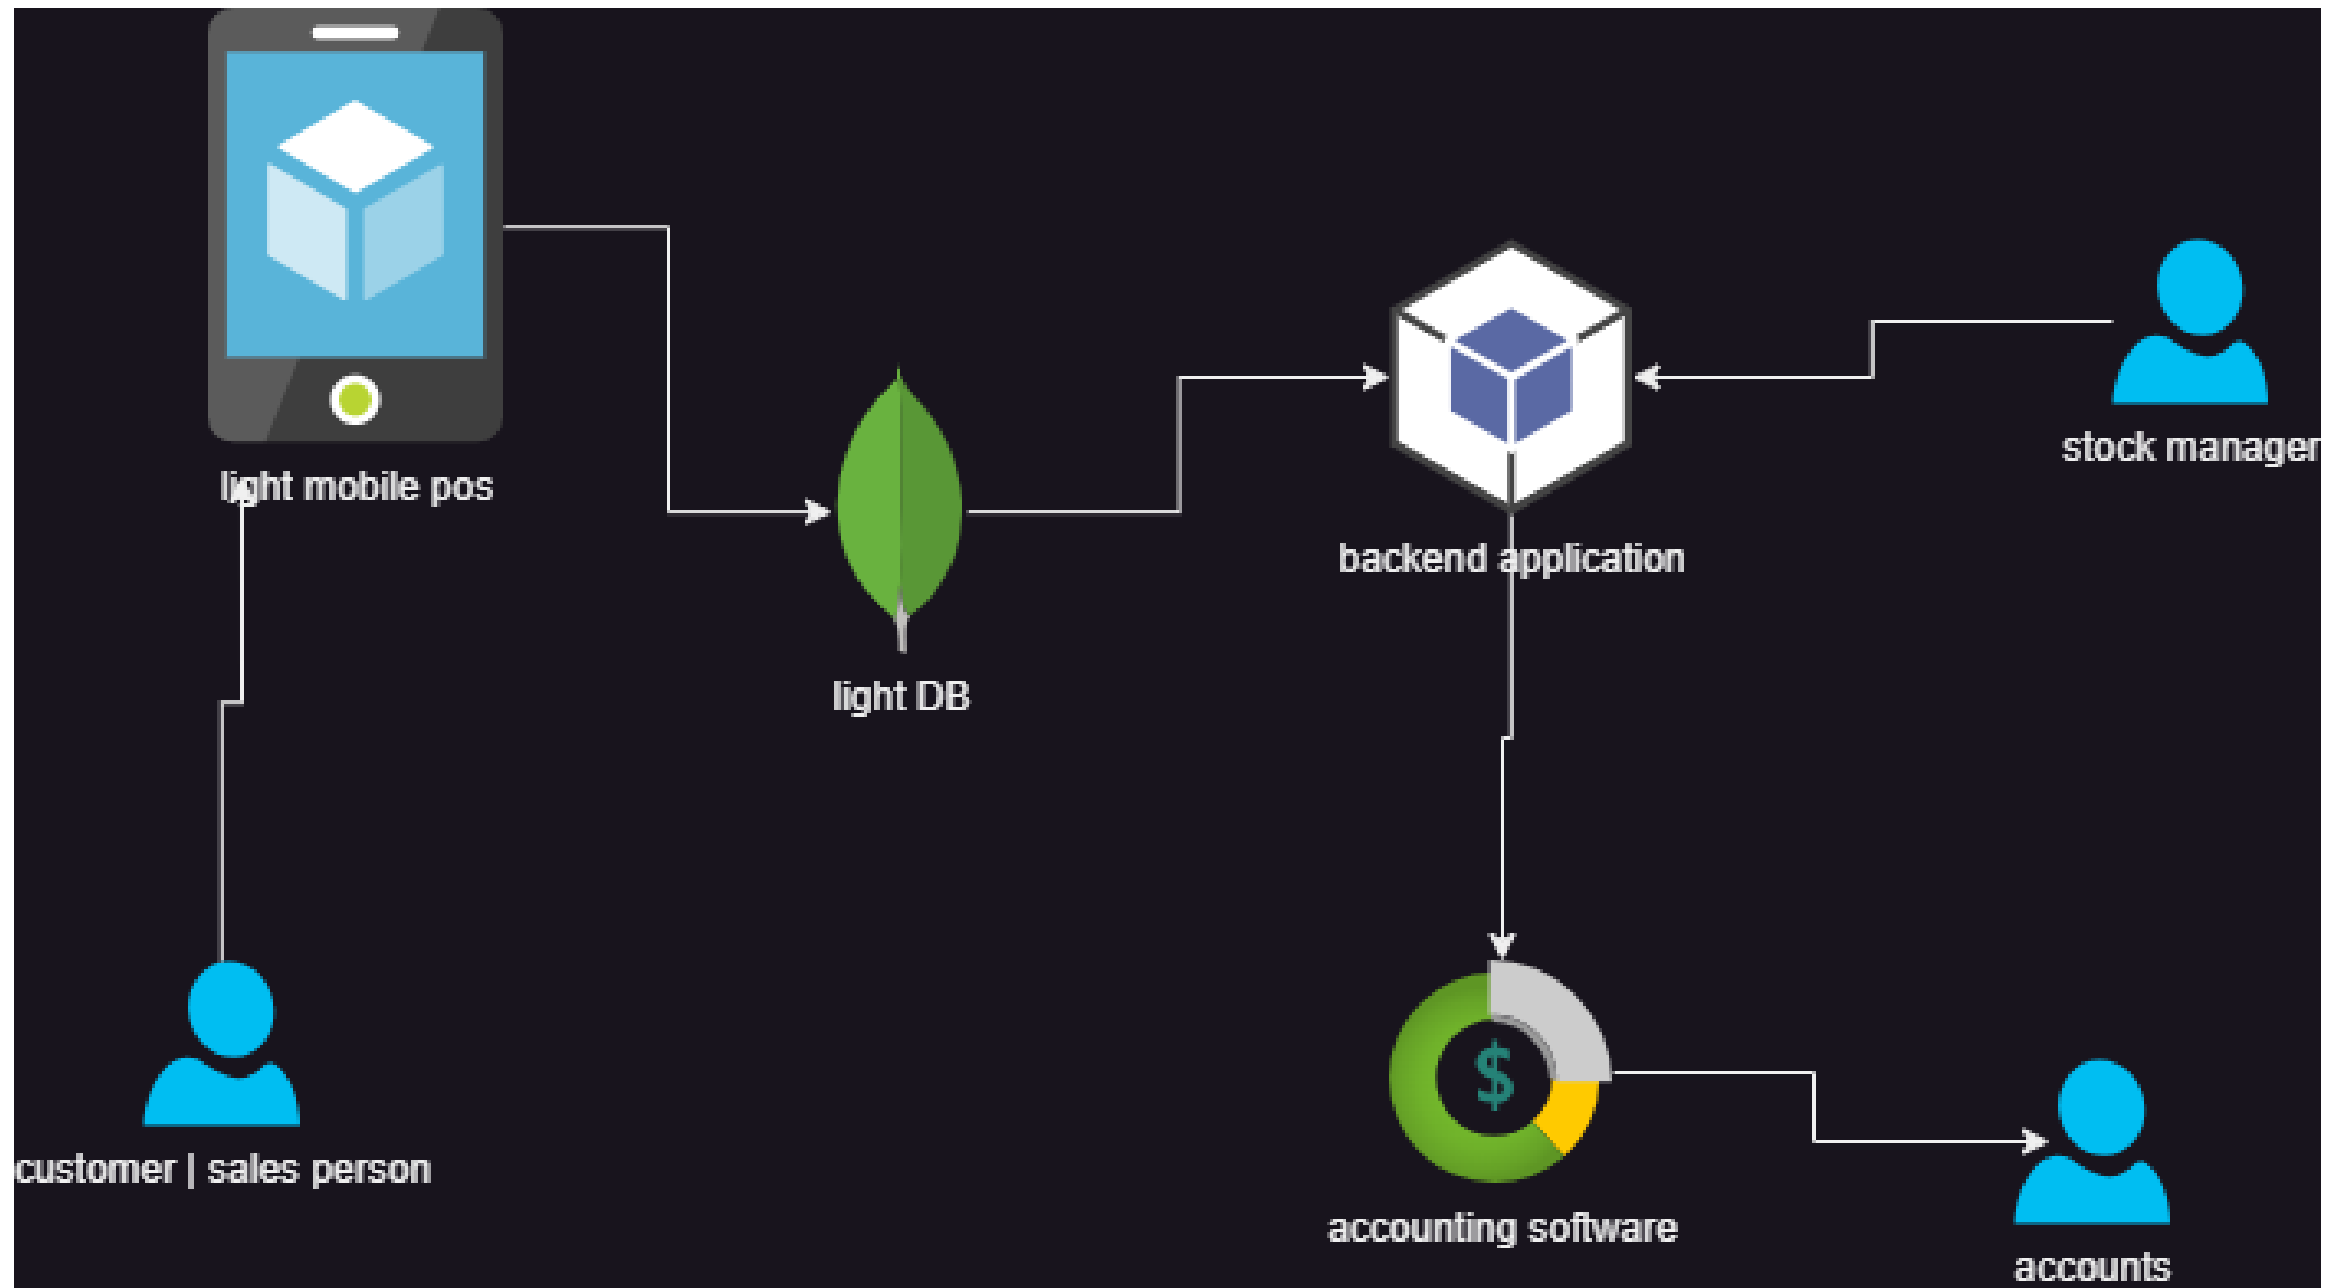

## Challenges

- customer would place order manually.
- lack of reports on order and delivery
- Too much manual entry at time of billing
- single point of failure as billdesk needs to place all order.

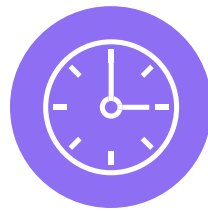

## Objectives

- Fast and easy order placing solution
- Order tracking and reporting
- Easy to update stock
- Integration with Billing System

# Solution Design

# Feature Highlights

## Low-Bandwidth Design

To ensure the app's performance in low-bandwidth environments, Zolute optimized the app's design to minimize data usage while maintaining a smooth user experience.

## Stock and Product Management

Zolute implemented a feature that allowed the owner to upload an Excel file to the server, automatically updating stock levels and product information. This streamlined the inventory management process and ensured accurate data.

## Integration with Accounting System

Zolute integrated the solution with the client's internal accounting system, enabling seamless synchronization of order data and financial information.

## Backend Panel for Order Monitoring

Zolute developed a backend panel that enabled the owner to monitor incoming orders in real-time. This provided a centralized view of order activity, enhancing operational efficiency.
